

Hey Guys,

Just wanted to say thanks for the education and let you know how much I've appreciated your service. You are welcome to use the following quote on your site if you want:

"The guys at Today Trader provide the best trading education available. I've watched their live service every day since it started 9 months ago and wouldn't have stayed so long if they didn't constantly deliver the insights they promise. Some of the things I've learned from them include:

- An understanding of sector correlations and how to identify a sector breakout
- How to be patient and wait for the right time to enter a trade based on technical indicators and other market conditions
- How to judge support and resistance to determine how long to stay in a trade
- Which technical indicators to use and how to configure them
- When to ramp up share size, when to scale down, and when not to trade
- How to trade based on relative strength, sympathy plays, and overbought/oversold conditions

In addition, even a more experienced trader can benefit from the information they deliver throughout the trading day including:

Pre-market discussion of relevant news and overall technical market analysis

Ongoing discussion of market developments and breaking news from multiple sources with analysis and trading advice

Two Q&A sessions each day to address your individual questions

Economic report reminders are provided each day both pre-market and again before the scheduled release time

Live view of trades executed with an explanation for taking each position

If you are unsure of a trade you are considering, you can enter a chat message for real-time analysis and recommendation

I highly recommend the Today Trader service. Marty C"
